this is a completely new typeset of the monumental 1957 classic containing an extensive historical and theological introduction and detailed in text notations by George R. Knight originally produced by the Ministerial Association of the General Conference of Seventh Day Adventists. Questions on doctrine was widely acclaimed and distributed in the late 1950s and early 1960s as a forthright answer to questions from evangelicals about key elements of Adventist doctrine. Controversy regarding the book's position on the nature of Christ and the atonement soon stopped its circulation as part of the Adventist Classic Library. Knight's essays provide the background for how the book came about and describes the interaction of the principal players involved in the crisis that shelved this classic work for more than a generation.

This leading mathematics text for elementary and middle school educators helps you quickly develop a true understanding of mathematical concepts. It integrates rich problem solving strategies with relevant topics and extensive opportunities for hands-on experience by progressing from the concrete to the pictorial to the abstract. Musser captures the way math is generally taught in elementary schools. This title will give you all the essentials mathematics teachers need for teaching at the elementary and middle school levels. Highlights algebraic concepts throughout the text and includes additional supporting information. Provides enhanced coverage of order of operations, z-scores, union of two events, least common multiple, and greatest common factor. Focuses on solid mathematical content in an accessible and appealing way. Offers the largest collection of problems over 3,000 worked examples and problem solving strategies in any text of its kind. Includes a comprehensive five chapter treatment of geometry based on the van Hiele model.
