medical care is an industry and private providers and hospitals are the major service providers they operate on business principles hospitals are getting highly specialized and complex the diagnostics and therapeutics are technology intensive private establishments have to compete with one another to remain in business they strive to induct the best talent and latest technical know how resulting in ever increasing costs to patients patients who pay high charges demand quality as a matter of right to meet the

challenge hospitals are constrained to bring in professionalism in their systems and services they appoint qualified professional managers to manage their clinics and hospitals with a view to sparing health professionals to focus on clinical care whether right or wrong management is often associated with authority and power as a result the medical professionals are reduced to secondary level in some organizations to retain commanding positions in medical organizations it has become necessary for the healthcare professionals to learn management at least its basics on the other hand non medical managers while managing healthcare services do not get the required cooperation from the medical professionals as the latter are often secretive and not willing to share medical knowledge if medical knowledge is demystified non medical managers can perform many functions in healthcare organizations proficiently both medical and non medical managers can complement each other in providing quality healthcare services the book aims to orient clinicians including physicians and nurses and other healthcare professionals on the essentials of business management and to familiarize them with management terms and jargon they can learn to be effective managers besides being health professionals similarly non medical managers can get familiarized to nuances of clinical care and special managerial requirements of healthcare facilities they all will be able to relate processes in healthcare settings with the concepts of business management they can develop expertise on patient relationship management

the revised and updated edition of this book is both practical and topical it addresses planning strategies that will work for healthcare organizations the advice and practical aids are designed to help readers with easy to find answers to common planning questions the careful use of theory provides a rationale for the services cited to help the reader understand the limits of the advice and when it is necessary to seek expert help a particularly good example of this is seen in chapter five in which an asthma study is used to illustrate how business planning issues arise from clinical issues to hospital managers clinical practitioners and others new to management

the covid 19 pandemic has created unprecedented challenges to those responsible for the management of healthcare activities these challenges require decision makers at all levels to possess a broad and comprehensive understanding of healthcare management tools and especially of the interaction between formal control systems and the informal power dynamics which operate within healthcare organisations managing in healthcare is not only difficult because of the sector's high stakes ethical contexts but also because the health care workforce is inherently complex and heterogeneous it is the purpose of this book to survey the expanding literature on management control in healthcare with the aim of giving readers a better understanding of the options available to managers decision makers and also educated observers of this important sector this book summarises key debates and findings in this rapidly developing and increasingly important field it explores state of the art models and approaches highlights unexplored questions and gives an outlook on novel and developing trends in so doing it provides a hands on guide for aspiring healthcare managers and practitioner and offers critical insights into the more advanced academic literature for those seeking a thorough grounding in the accounting and finance aspects of healthcare management

until now research has given us only a limited understanding of how managers actually make sense of and apply management knowledge how networks of interaction amongst managers help or hinder processes of knowledge diffusion and the sharing of best practice and how these processes are all influenced both by the organisations in which

managers act and by the professional communities of practice they belong to managing modern healthcare fills these important gaps in our understanding by drawing upon an in depth study of management networks and practice in three healthcare organisations in the uk it draws from the primary research a number of important and grounded lessons about how management networks develop and influence the spread of management knowledge and practice how management training and development relates to the needs of managers facing challenging conditions and how those conditions are themselves shaping the nature of management in healthcare this book reveals how managers in practice are responding to the many contemporary challenges facing healthcare and the nhs in particular and how they are able or not to effectively exploit sources of knowledge learning and best practice through the networks of practice they engage in to improve healthcare delivery and healthcare organisational performance managing modern healthcare makes a number of important theoretical contributions as well as practical recommendations the theoretical and empirical contributions the book makes relate to wider work on networks and networking management knowledge situated learning communities of practice professionalization professional identity and healthcare management more generally the practical contribution comes in the form of recommendations for healthcare management practitioners and policy makers that are intended to impact upon and help enhance healthcare management delivery and performance
